DEBRIS COLLECTION CAPABILITIES

	ALL MATERIALS	HEAVIEST MATERIALS	ALL MATRIALS	ALL MATERIALS	ALL MATERIALS			
	SMALLER AREAS	LARGE AREAS	LARGE AREAS	MATERIAL TRANSFER	MATERIAL TRANSFER			
	300 SERIES	400 SERIES	800 MOBILE	800 STATIONARY	800 HYBRID			
Standard Vacuum	16" Hg and 600 cfm	18" Hg and 1,650 cfm 16" Hg and 1,800 cfm						
Motor Power (HP)	20-25	20-75						
Max Conveyance (Ft)	200	500						
Pickup Capacity (TPH)	Up to 8	Up to 22.5						
Filter Type	Round wide-pleat GORTEX	Envelope-style Round wide-pleat GORTEX						
Filter Surface Area (Ft ²)	132	300	72-144					
HEPA Filtration	Optional							
Filter Access	Τα	p	Top, swing-out lid assist					
Material Separation	2-stage	3-stage 2-stage						
Material Capability	Dry, Wet, Liquid							
Hopper Capacity (Yd³)	0.4	1 tc	2	0.5 to 2	0.75			
Hopper Dump Type		Self-dumping design		Bottom or continuous discharge				
Explosion Proof Options	Limited	Yes						
Unit Movement	Portable	Portable, available in-p	lant & highway trailers	N/A	Portable			
Unit Footprint	55" x 58"	73" x 88"	67" x 82"	96" x 56" & 54" x 55"	72" x 85"			
Unit Weight (Lbs)	2,990	6,715	6,335	4,260 & 4,338*	9,718			

* Weight & dimensions may vary depending on powerhead configuration.

THE MOST DURABLE INDUSTRIAL VACS ON EARTH

LEGENDARY DURABILITY

- Universal ³/₁₆" plate steel construction
- Abrasion-resistant intake components
- Runs for years with minimal maintenance

ROBUST AND

- Robust 16" to 18" Hg PD vacuum pumps
- Cool running TEFC electric motors
- Up to 300 ft² of filter surface area

BULLETPROOF OPERATION

- Automatic filter cleaning systems
- Multi-stage filter systems keep waste in the hopper and out of the blower
- Broken filter shutdown
- Dirty filter shutdown
- High blower discharge temp shutdown
- Full unit hopper shutdown

WASTE BITES THE DUST

Any Material, From Dry & Light to Heavy & Wet

Cleans Up Everywhere

Protects Your Plant and Your People

MOVES ANY MATERIAL

- Captures the lightest fugitive dust, combining high air volume with highly clog-resistant filtration
- Wet heavy sludge options, with maximum power & abrasion-resistance
- Conveyance distances out to 500'
- Conveyance capacity up to 22.5 Tons Per Hour (TPH)

CLEANS UP EVERYWHERE

- Mobile configurations for general dust & waste collection
- Stationary configurations for material recycling or conveyance
- Position indoors with electric power & sounddeadening packages
- Position outdoors or remote with optional diesel or LNG power

PROTECTS YOUR PLANT PROTECTS YOUR PEOPLE

ACAUTRAL

- Comprehensive explosion-prevention options, including filter grounding, explosion isolation, and Class I/II control panels
- Available exclusive dry gel baghouse fire extinguisher system
- Helps you meet OSHA combustible dust standard 29 CFR 1910.307 and Directive CPL 03-00-008
- Very fine particulate matter capture with HEPA filter options, available on all units
- Helps you meet OSHA respirable silica standard 29 CFR 1910.1053, and MSHA 30 CFR Part 60

YOUR MANIFOLD SOURCE

- Full consultive design services available
- Standard CAD drawings with detailed bills of materials for all projects
- Comprehensive project management services, including initial & pre-install walkthroughs, provided for all projects
